

50*150mm flat oval tube combines with 60*120mm oval tube, makes the machines mature and elegant.

Design the machines according to the international advanced concept and improve on the original

basis. Resistance remains steady during the entire range of motion, making the movement exceptionally fluid.

Pure steel weight plate enhances the product durability.

Training counting & training time recodes make the movement more scientific and humanized.

Full closed PVC covers with one time contoured to keep user safe, increases the attraction and underlines the high quality.

Unique separated movement allows the user practice single arm, highlights the details and humanization of the products.

Aluminum alloy pulley with $\Phi 106.2\text{mm}$, improve the durability and keep movement smoothly, it is easy to maintain.

The handle adopts TPV material, never damage and improves the durability.

Imported powder of painting, double rust clean, double lines cushion showing fashion.

The gradually slowing action mode can energize most of the pectorals major muscle, while minimizing the involvement of the anterior deltoid.

Two linkage motion arms and adjustable knobs which can be adjusted to different positions for arm muscle group.

Energize different pectorals major muscle group by forward and backward bidirectional motions, and transfer the power to the specific muscle directly.

Minimize the outward rotation of the arms, thereby reducing the pressure on the shoulder joint.

The seat can be adjusted to the user's desired range of motion when used.

Specifications

DIM: (L) 1150*(W) 1280*(H) 1950mm

N. W. : 206KG

Weight stack:

Standard: 80KG

Max: 180KG

Muscles trained: Pectoralis major muscle
