

Based on international advanced design concept, upgrade the structure, adapt to the needs of various users.

Adopt international advanced production facilities—laser cutting machines, automatic welding robots, CNC facilities etc, to achieve top standard tooling operations. Combine chemical treatment process and electrostatic spraying process, ensure perfect appearance.

Main tube thickness: 3mm, combine oval tube thickness: 50*100mm

Adopt high tensile oval tube, thickness: 60*120mm

According with ergonomics and biomechanical principle, the movement trail scientific and rational, makes exercising smooth .

Specifications

DIM: (L)2450*(W)1735*(H)2390mm

N. W. : 288KG
